

Accomplish More with Less

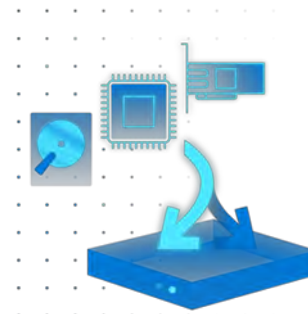

With Microsoft Azure Hybrid Cloud, VDI, Containerized Apps, and AI at the Edge

DataON[®]

Azure Arc-Enabled Azure Local

- Modernize and secure your data center infrastructure
- Affordably run intelligent edge and remote branch office solutions
- Azure Arc gives you unified resource management and a flexible cloud-connected architecture

DataON Integrated Systems for Azure Local

- Turnkey solutions featuring Intel technologies that require little deployment effort from IT staff
- Fastest time-to-value through the pre-installed software, drivers, and firmware updates
- World-class support with joint support agreements with both DataON & Microsoft

Azure Virtual Desktop for Azure Local

Enable remote workforce with enterprise app and NVIDIA GPUs.

AKS Applications on Azure Local

Develop in AKS but deploy unmodified to the edge, AI/ML workloads.

Azure Arc-enabled SQL Managed Instance

Move SQL Server applications to Arc services with minimal application and database changes.

Azure Site Recovery, Backup, and File Sync

Deliver business continuity with hybrid cloud business continuity & disaster recovery.

AI at the Edge

Deploy accelerated AI workloads at the edge via containers and NVIDIA graphics processing units (GPUs)
